PAVÉ AR_GENT

IL FASCINO DELL'IMPERFEZIONE, CELEBRA LA NATURALE BELLEZZA DELLA PIETRA

THE CHARM OF IMPERFECTION, CELEBRATING THE NATURAL BEAUTY OF STONE
 LE CHARME DE L'IMPERFECTION, CÉLÈBRE LA BEAUTÉ NATURELLE DE LA PIERRE
 DER CHARME DER UNVOLLKOMMENHEIT FEIERT DIE NATÜRLICHE SCHÖNHEIT DES STEINS

Ar_gent è un progetto trasversale, dai toni neutri e infinite possibilità di posa per un design contemporaneo, minimale, versatile e raffinato.

Si ispira alla bellezza del Limestone Argent, una delle pietre più raffinate della Penisola Iberica. La riproduzione della superficie lapidea permette di apprezzarne la grafica, animata da delicati effetti 3D, riflessi di luce e piccoli inserti. Il risultato è un'elegante ma informale reinterpretazione della pietra, che celebra l'incantevole fascino dell'imperfezione.

Il progetto si sviluppa in 7 formati declinati in 4 nuance – Ash, Cream, Dark, Greige – in grado di esaltare la struttura della materia evocandone la ricercatezza sin dal primo sguardo. Arricchiscono la collezione i mosaici e la duplice finitura delle superfici.

Per garantire l'impiego multiuso Sichenia sviluppa la collezione dotandola della nanotecnologia Soft Grip: morbida al tatto ma resistente allo scivolamento. Oltre ai 10mm e 20mm, emerge il nuovo spessore 14mm: un prodotto dalle elevate caratteristiche tecniche ed estremamente resistente.

Ancora una volta, Sichenia sviluppa un ricco progetto che si distingue per varietà dei formati, spessori, eleganza di tinte e texture. Tutte caratteristiche che, insieme, ne consentono l'impiego "IN" e "OUT" sia a pavimento che a rivestimento per progetti residenziali e commerciali.

Ar_gent is a versatile project, with neutral tones and infinite laying solutions for contemporary, minimal and refined architecture.

It is inspired by the natural beauty of Limestone Argent, one of the most elegant Limestones from the Iberian Peninsula. This appealing rendition of the stone surface brings to life the graphical elements that feature soft 3D effects, light reflections and small flecks. The result is an elegant but informal reinterpretation of stone that celebrates the charm of imperfection.

The collection is available in 7 formats and 4 colours, Ash, Cream, Dark and Greige, that instantly give depth to the structure by emphasizing its natural elegance. The collection is also enriched by a range mosaics and is available in two surface finishes.

To guarantee multipurpose use, Sichenia has enriched the collection with a state-of-the-art nanotechnology called Soft Grip: it is smooth to the touch but at the same time maintains anti-slip properties.

In addition to 10mm and 20mm, Sichenia has also launched the new 14mm thickness: a product with high-end technical features that is extremely resistant. Once again, Sichenia has developed a comprehensive collection that stands out for its wide range of formats, of thicknesses, elegance of colors and depth of textures. All those features allow "IN" & "OUT" applications, both on floors and on walls for residential and commercial projects.

Ar_gent est un projet transversal, avec des tons neutres et des possibilités de pose infinies pour un design contemporain, minimal, polyvalent et raffiné. Il s'inspire de la beauté naturelle de Limestone Argent, l'une des pierres calcaires les plus raffinées de la péninsule ibérique. La reproduction de la surface de la pierre permet d'apprécier ses graphismes, animés par de délicats effets 3D, des reflets lumineux et de petits inserts. Le résultat est une réinterprétation élégante mais informelle de la pierre, qui célèbre le charme d'imperfection.

Le projet se développe en 7 formats déclinés en 4 nuances - Ash, Cream, Dark, Greige - capable d'améliorer la structure de la matière en évoquant son raffinement dès le premier coup d'oeil. La collection s'enrichit de mosaïques et de la double finition des surfaces.

Pour garantir une utilisation polyvalente, Sichenia développe la collection avec la nanotechnologie Soft Grip: douce au toucher mais en même temps résistante au glissement.

En plus des 10 mm et 20 mm, émerge la nouvelle épaisseur de 14 mm: un produit avec des performances techniques élevées et extrêmement résistant.

Une fois de plus, Sichenia développe un projet riche qui se démarque par ses variétés de formats, d'épaisseurs, d'élegance des couleurs et des textures. Toutes les fonctionnalités qui permettent d'utiliser "IN" et "OUT" au sol et sur les murs pour des projets résidentiels et commerciaux.

Die Kollektion Ar_gent ist ein Querprojekt mit neutralen Tönen und unendlichen Verlegungsmöglichkeiten für ein zeitgemäßes, minimalistisches, vielseitiges und raffiniertes Design.

Bei der Entwicklung der Kollektion wurden wir inspiriert durch die natürliche Schönheit von Limestone Argent, einem der raffiniertesten Kalksteine der Iberischen Halbinsel. Die Reproduktion der Steinoberfläche ermöglicht es Ihnen, die Grafiken zu schätzen und wahrzunehmen, die durch feine 3 D-Effekte, Lichtreflexionen und kleine Einschlüsse animiert werden. Das Ergebnis ist eine elegante, aber informelle Neuinterpretation des Steins, die den bezaubernden Charme der Unvollkommenheit zelebriert.

Das Projekt entwickelt sich in 7 Formaten und 4 Nuancen, angelehnt an Ash, Cream, Dark, Greige – diese Vielfalt ist in der Lage die Struktur der Materie zu verbessern und auf den ersten Blick ihre Verfeinerung hervorzuheben. Die Kollektion wird durch Mosaik und die doppelte Oberflächenausführung bereichert.

Um den Mehrzweckgebrauch zu gewährleisten, entwickelte Sichenia die Kollektion, indem sie mit Soft Grip-Nanotechnologie ausgestattet wurde: fühlt sich glatt und angenehm an, verfügt aber gleichzeitig über Anti Slip-Eigenschaften.

Neben 10 mm und 20 mm entsteht die neue Dicke von 14 mm: Ein Produkt mit hohen technischen Leistungen und extremer Widerstandsfähigkeit.

Erneut entwickelt Sichenia ein reichhaltiges Projekt, dass sich durch Formate, Stärken, Eleganz der Farben und Texturen auszeichnet. Alle Funktionen, die in diesem Projekt zusammenkommen, ermöglichen den Einsatz des Materials IN und OUT, sowohl auf dem Boden, als auch an Wänden für Wohn- und Geschäftsbereiche.

Very fine coloured powders, compacted with large hydraulic presses and vitrified through firing at 1250°C, give life to **SICHENIA 14mm** porcelain stoneware with 14mm thickness. Our production process makes **SICHENIA 14mm** three times more resistant when compared to traditional 10mm tiles.

SICHENIA 14mm has a tensile strength of 600kg compared to the 200 kg of traditional 10 mm stoneware and has high levels of resistance to foot traffic, wear and abrasion. This means that **SICHENIA 14mm** can be used in homes but also in high traffic areas such as airports.

. It does not deform, is resistant to subzero temperatures and is unaffected by temperature changes

. It does not retain dirt and it is easy to clean

. **Soft Grip** nanotechnology makes the material extremely adaptable, perfect for indoors and outdoors and for public or private environments.

. It is produced with a minimum of 40% recycled material and does not present phenomena of dispersion of toxic materials into the air. This characteristic makes it an environmentally friendly material.

Des poudres très fines de couleur, compactées avec de grandes presses hydrauliques et vitrifiées par cuisson à 1250 ° C, donnent vie au **SICHENIA 14mm**, grès cérame de 14 mm d'épaisseur. Notre processus de production permet au **SICHENIA 14mm** d'être trois fois plus résistant que le traditionnel 10 mm.

. **SICHENIA 14mm** a une charge de rupture de 600 kg contre 200 kg pour le grès de 10 mm et présente des niveaux élevés de résistance au piétinement et à l'abrasion. Cela le rend utilisable à la fois pour les étages à très fort trafic, tels que les entrées d'aéroport, et pour le privé.

. Il ne se déforme pas, ne gèle pas et n'est pas affecté par les changements brusques de température.

. Il ne retient pas la saleté et est facile à nettoyer.

. La nanotechnologie **Soft Grip** rend le matériau extrêmement adaptable, pratique pour l'intérieur et l'extérieur et pour les environnements publics ou privés.

. Étant produit avec un minimum de 40% de matière recyclée, ne présentant pas de phénomènes de transfert ou de dispersion dans l'air de matières toxiques, il devient donc un matériau respectueux de l'environnement.

Sehr fein gefärbte Pulver, die mit großen Hydraulikpressen verdichtet und durch Brennen bei 1250 ° C verglast werden, geben **SICHENIA 14mm** dickem Feinsteinzeug, Leben. Unser Produktionsprozess ermöglicht es **SICHENIA 14mm**, dreimal stärker als die herkömmlichen 10 mm zu sein.

. **SICHENIA 14mm** hat eine Bruchlast von 600 kg im Vergleich dazu 10mm starkes Feinsteinzeug nur 200 kg. Ebenso eine hohe Beständigkeit gegen Trampeln und Abrieb. Dies macht es sowohl für sehr stark frequentierte Bereiche wie Flughafeneingänge als auch für Privathaushalte geeignet.

. Es verformt sich nicht, gefriert nicht und wird nicht durch plötzliche Temperaturwechsel beeinträchtigt.

. Es nimmt keinen Schmutz auf und ist leicht zu reinigen.

. Die **Soft Grip**-Nanotechnologie macht das Material äußerst anpassungsfähig, praktisch für den Innen- und Außenbereich sowie für öffentliche oder private Umgebungen.

. Da es mit mindestens 40% recyceltem Material hergestellt wird und keine Ausdünstung oder Dispersion toxischer Materialien in die Luft aufweist, ist es ein umweltfreundliches Material.

SOFT GRIP

LA NANOTECNOLOGIA CHE UNISCE IN UN SOLO PRODOTTO TUTTE I PREGI DELLA CERAMICA

39

Immaginare di utilizzare la stessa superficie per più destinazioni d'uso è ora possibile grazie all'evoluzione dello smalto utilizzato nelle collezioni Sichenia. La finitura Soft Grip si presenta morbida e piacevole al tatto ma al tempo stesso resistente allo scivolamento, con elevate prestazioni tecniche. Questa nuova tecnologia permette di posare la stessa collezione in diverse aree, può essere utilizzata sia in ambienti interni che esterni, residenziali e commerciali, rendendo armoniose ed equilibrate tutte le zone. Non c'è più bisogno di scegliere le collezioni in base alle destinazioni d'uso, grazie alla nanotecnologia targata Sichenia è possibile avere le migliori caratteristiche della ceramica in un solo prodotto. Fondamentale aspetto è anche il notevole risparmio in termini di spazio dato che non sarà più necessario rifornire il magazzino con diversi prodotti ma ne basterà solo uno dotato di tecnologia "Soft-Grip" che soddisferà qualsiasi richiesta.

THE NANOTECHNOLOGY THAT COMBINES ALL THE QUALITIES OF CERAMICS INTO ONE PRODUCT

Now it is possible to imagine the same surface for multiple uses, thanks to the revolutionary glaze used in Sichenia collections. The Soft Grip finish is smooth and pleasant to the touch but at the same time has anti-slip properties and high-end technical features. This new technology allows the same product to be placed in different areas, it can be used both indoors and outdoors, residential and commercial and makes all areas harmonious and balanced. There's no more need to choose collections according to the intended use, thanks to Sichenia's nanotechnology it is now possible to have the best characteristics of ceramics in one product. These intrinsic properties of the product also bring about substantial benefits when it comes to warehouse space management, as it is no longer necessary to have different products in stock for specific uses (indoor and outdoor), but only one version supplied with "Soft-Grip" technology that will satisfy any request.
